

VENATOR

Policy for Sustainability, Quality and Product Stewardship

Venator's core purpose is to be the world's best pigments and additives business. Our values reflect behaviours that will help us to become the best and deliver the greatest value to our customers and shareholders. They unite and guide us and reflect the culture of our business. We need to live our values – Integrity; Zero Harm; Teamwork; Innovation and Performance. To achieve this Venator will continue to develop systems to measure, report, identify improvement opportunities and implement necessary actions to deliver improvement across the business and throughout the supply chain.

This policy is openly communicated to all relevant parties.

Sustainability

Our EHS Vision is to be a ZERO Harm company – this means ZERO Harm to people, assets, communities and the environment. We will set programs in place to move us towards our ZERO Harm vision. Sustainability is a key part of the Venator core purpose and it is integrated into all that we do. Our sustainability program complements the EHS aspects of this policy.

We will openly communicate our environment, health, safety and sustainability performance regarding our operations to all our associates, contractors and the public.

Quality

Our aim is to completely satisfy the needs of our customers or stakeholders. In order to achieve this, we are totally committed to operating using manufacturing excellence principles, the control of quality, the continual development and improvement of our products in conformance with agreed customer specifications. We are dedicated to delivering excellent service through a supply chain that is sustainable and efficient.

In order to manage Quality, we will satisfy the requirements of the ISO9001 standard, continually strive to improve the efficiency and effectiveness of our management systems. This will be achieved through the setting and review of relevant objectives as well as targets based on the organisation's environment and assessment of needs, the use of trained and competent personnel, and allocation of adequate resources to deliver them.

Product Stewardship

We will manage our products from design through to use and final disposal to minimise risks and ensure that we meet all legislative requirements. We will work to anticipate future changes and expectations and will build sustainable partnerships with our stakeholders for mutual benefit through our Product Stewardship activities.

The responsibility to drive Product EHS improvement throughout the business is shared by all of us.
