VENATOR TO ATTEND NAM25

5-8 June 2017, Hyatt Regency Denver Hotel, Denver, Colorado USA

Wynyard, UK – Catalysts experts from global chemical company Venator will be exhibiting at the NAM25 at the Hyatt Regency Denver hotel in June. At the event, Venator will share information about their latest product for catalysis, high pore volume titanium dioxide – designed to meet the special requirements for hydrotreating applications. In addition, novel titanium dioxide based catalyst supports for Fischer-Tropsch synthesis will be presented.

Venator has been active in the global catalyst industry for many decades, supplying the sector with specialty titanium dioxide for catalytic applications such as SCR, Claus, photocatalysis, refineries, oxidation catalysis, polymerization, and in hydroprocessing.

To arrange to meet one of our catalysis experts at the show please contact us: info@venatorcorp.com
